

## Data Sheet

### FluoTag-X4 anti-Rabbit IgG Fluorophore-conjugated

Fluorophore	Catalog No. (500 µl)	Catalog No. (2000µl)
Abberior <sup>®</sup> Star 580	N2404-Ab580-S	N2404-Ab580-L
Abberior <sup>®</sup> Star RED	N2404-AbRED-S	N2404-AbRED-L
Abberior <sup>®</sup> Star 635P	N2404-Ab635P-S	N2404-Ab635P-L
Alexa Fluor <sup>®</sup> 647	N2404-AF647-S	N2404-AF647-L
Atto488	N2404-At488-S	N2404-At488-L
Atto542	N2404-At542-S	N2404-At542-L
Atto565	N2404-At565-S	N2404-At565-L
Atto647N	N2404-At647N-S	N2404-At647N-L
Sulfo-Cyanine 3	N2404-SC3-S	N2404-SC3-L
Sulfo-Cyanine 5	N2404-SC5-S	N2404-SC5-L

**Identity** Camelid sdAb anti-Rabbit IgG, Clones 8C10/10E10

**Content** 2.5 µM of each fluorescently labeled sdAb clone in buffered saline, 50% glycerol, 0.09% sodium azide.  
10 µM total fluorophore concentration

**Storage** Up to 3 months: -20 °C  
Up to 12 months: -80 °C or below  
Protect from light!

**Applications** IF/ICC/WB Recommended dilution 1:500

**Specificity** Specifically recognizes Rabbit IgG  
Does not cross-react with antibodies from species like: Mouse, Guinea Pig, Rat, Chicken or Goat.

For more information please visit our web page at [www.nano-tag.com](http://www.nano-tag.com)

To be used *in vitro* / for research only.  
Non-toxic, non-hazardous, non-infectious.
