Scientist as
Application Specialist and Marketing Manager (m/f/d)

We are looking for a highly motivated person with a background in life sciences or biotechnology to join us in marketing and technical customer support in Göttingen, Germany.

NanoTag Biotechnologies GmbH is a biotech company based in Göttingen. NanoTag develops and distributes innovative antibody-based reagents ("nanobodies") for research and diagnostics as well as for therapeutic applications. The permanent full-time position (40h/week, possibly also part-time), which is preferably to be filled at short notice, mainly involves support in the development and implementation of marketing strategies and technical customer support.

Your tasks include among others

- Development of new marketing strategies and concepts and their implementation
- Create, launch and maintain technical content such as graphics, videos, workshops, tutorials and social media content.
- The presentation of our products and services for demanding research tasks in science and industry at trade shows and congresses

Your profile

- Very good organisational and communication skills as well as a thorough and detail-oriented work ethic
- Excellent communication and presentation skills in English and German (other languages welcome)
- A degree in biophysics, chemistry, biochemistry, molecular biology, pharmacology, biotechnology or similar (MSc or PhD)
- Solution-oriented, with strong problem-solving skills
- A friendly, enthusiastic personality with great team spirit
- You are a technical expert who is happy to advise, train and provide practical support to our customers.
- The ability to drive projects independently and manage multiple projects simultaneously

- Experience in the use or comprehensive understanding of immunological methods such as epifluorescence microscopy, immunoprecipitation or antibody development is an advantage.

We offer

- Inspiring, creative work in a small team
- Personal training in all relevant techniques
- Regulated working hours without weekend and holiday services
- Competitive pay and a permanent employment contract
- A highly qualified and solution-oriented team without hierarchies
- We try to make all employees better; whether through our experience, training or daily interaction at an equal footing.

Please send us your complete application including salary expectations by email to:
